Summary

Full Stack Web Development student with hands-on experience building web applications, REST APIs, and database-driven systems. Skilled in both front-end and back-end development, with a strong focus on clean structure, business logic, and practical problem-solving. Comfortable working with modern tools and frameworks to build responsive, maintainable, and scalable web solutions.

Projects

Planixa / Shedio – CMC Timetable Management and Auto-Generation System 2026

Designed and contributed to a full stack academic scheduling platform built for managing and generating timetables based on real institutional constraints.

- Worked on timetable auto-generation logic using scheduling rules, weekly distribution, and academic constraints.
- Contributed to role-based access features for administrators, coordinators, trainers, and other users.
- Participated in the implementation of timetable consultation, session management, and scheduling workflows.
- Helped structure relational database logic and business rules for timetable generation and validation.
- Followed a separated front-end and back-end architecture to improve maintainability and scalability.

Personal Full Stack Web Projects

Ongoing

Built multiple practice and portfolio projects to strengthen full stack development skills.

- Developed responsive web interfaces using modern front-end technologies.
- Built CRUD-based web applications connected to relational databases.
- Created and consumed REST APIs for data management and dynamic content display.
- Implemented authentication, validation, routing, and middleware logic in web applications.

Education

CMC Tangier-Tetouan-Al Hoceima – OFPPT

Sep 2024 – Jun 2026

Diploma in Full Stack Web Development

Focused on building dynamic web applications, database design, API development, and modern front-end integration.

Technical Skills

Frontend: HTML5, CSS3, JavaScript, React.js, Vue.js, Next.js, Three.js

Backend: PHP, Laravel, Node.js, Express.js, REST APIs

Databases: MySQL, PostgreSQL, MongoDB, SQL

Tools: Git, GitHub, GitLab, Postman, SonarQube, Jenkins, VS Code

Core Concepts: MVC Architecture, Authentication, Validation, Middleware, CRUD, Routing, API Integration, Responsive Design, Clean Code, Business Logic

Soft Skills

Problem Solving, Adaptability, Team Collaboration, Analytical Thinking, Organization, Continuous Learning
